Praktikum 10: Android View and View Group

Membuat Aplikasi Aplikasi Sederhana dengan memanfaatkan komponen View dan ViewGroup.

1. Membuat Project Baru

Nama Project	ViewandViews
Languange	Java
Type Activity	Empty Activity

2. Menambahkan dependensi 'de.hdodenhof:circleimageview:3.1.0' pada build.gradle

```
plugins {
   id 'com.android.application'
android {
   namespace 'com.example.viewandviews'
   compileSdk 32
   defaultConfig {
       applicationId "com.example.viewandviews"
       minSdk 31
      targetSdk 32
       versionCode 1
       versionName "1.0"
       testInstrumentationRunner
"androidx.test.runner.AndroidJUnitRunner"
   }
   buildTypes {
       release {
           minifyEnabled false
           proguardFiles
getDefaultProguardFile('proguard-android-optimize.txt'),
'proguard-rules.pro'
   compileOptions {
       sourceCompatibility JavaVersion.VERSION 1 8
       targetCompatibility JavaVersion.VERSION 1 8
}
```

```
dependencies {
   implementation 'androidx.appcompat:appcompat:1.4.1'
   implementation 'com.google.android.material:material:1.5.0'
   implementation 'androidx.constraintlayout:constraintlayout:2.1.3'
   testImplementation 'junit:junit:4.13.2'
   androidTestImplementation 'androidx.test.ext:junit:1.1.3'
   androidTestImplementation
'androidx.test.espresso:espresso-core:3.4.0'
   implementation 'de.hdodenhof:circleimageview:3.1.0'
}
```

3. Me-resource string-string yang akan dibuat

```
<resources>
   <string name="app name">Pembelian</string>
   <string name="content text">Headphone ultranyaman WH-1000XM5
mengubah arti dari mendengarkan tanpa gangguan dan kejernihan
panggilan yang luar biasa. Dua prosesor mengontrol beberapa mikrofon,
menghasilkan noise cancelling yang belum pernah ada sebelumnya,
sedangkan Auto NC Optimizer mengoptimalkan noise cancelling secara
otomatis berdasarkan kondisi dan lingkungan pemakaian. Unit driver
30mm desain khusus menghasilkan kualitas suara superior untuk semua
hiburan Anda.</string>
   <string name="content specs display">30mm</string>
   <string name="content_specs_size">
       - Active Noise Cancellation\n
       - Quick-Charge 3mins. → 1hrs (10mins → 5hrs)
   </string>
   <string name="content specs battery">10000 mAh battery\n
   Standby time (LTE): up to 19 days\n
   Talk time (3g/WCDMA): up to 26 hours\n
   Internet use time (Wi-Fi): up to 13 hours\n
   Internet use time (LTE): up to 13 hours\n
   Video playback: up to 13 hours\n
   Audio playback (via headset): up to 110 hours\n
   Fast charging: up to 7 hours of use from only 15 minutes of
charging</string>
   <string name="stock">Stock hanya 5 buah</string>
   <string name="specification">Spesifikasi</string>
   <string name="display">Size</string>
   <string name="size">Feature</string>
   <string name="battery">Other</string>
   <string name="seller">Dijual oleh</string>
   <string name="my name">Bapak Abyan</string>
   <string name="buy">Beli</string>
   <string name="dummy value">$100000</string>
   <string name="dummy_photos">420 photos/string>
   <string name="hubungics">Hubungi CS </string>
   <string name="sudahBeli">Produk telah berhasil dibeli" </string>
```

```
</resources>
```

4. Memasukkan file "pak_burhan", "headet.jpeg", dan "check.png" kedalam drawable

```
✓ Image  
✓ Im
```

5. Membuat tampilan pada main activity

Sesuai yang telah diinstruksikan sebelumnya, telah ditambahkan pula button "Hubungi CS" (tercetak tebal) yang nantinya berfungsi melakukan intent ke dial number.

```
<?xml version="1.0" encoding="utf-8"?>
<ScrollView xmlns:android="http://schemas.android.com/apk/res/android"</pre>
  xmlns:app="http://schemas.android.com/apk/res-auto"
  android:layout width="match parent"
  android:layout height="match parent">
  <LinearLayout
       android:layout width="match parent"
       android:layout height="wrap content"
       android:orientation="vertical">
       <FrameLayout
           android:layout width="match parent"
           android:layout height="wrap content">
           < ImageView
               android:layout width="match parent"
               android:layout height="270dp"
               android:adjustViewBounds="true"
               android:contentDescription="TODO"

            android:layout weight="1"
            android:text="@string/content specs display" />
    </TableRow>
    <TableRow
        android:layout width="match parent"
        android:layout height="wrap content"
       android:layout marginBottom="8dp">
        <TextView
            android:layout width="wrap content"
            android:layout height="wrap content"
            android:layout marginEnd="16dp"
            android:textSize="14sp"
            android:text="@string/size" />
        <TextView
            android:layout width="match parent"
            android:layout height="wrap content"
            android:layout weight="1"
            android:textSize="14sp"
            android:text="@string/content specs size" />
    </TableRow>
    <TableRow
        android:layout width="match parent"
        android:layout height="wrap content"
       android:layout marginBottom="8dp">
        <TextView
            android:layout width="wrap content"
            android:layout height="wrap content"
            android:layout marginEnd="16dp"
            android:textSize="14sp"
            android:text="@string/battery" />
        <TextView
            android:layout width="match parent"
            android:layout height="wrap content"
            android:layout weight="1"
            android:textSize="14sp"
            android:text="@string/content specs battery" />
    </TableRow>
</TableLayout>
<TextView
   android:layout width="match parent"
   android:layout height="wrap content"
```

```
android:textSize="12sp"
           android:layout marginLeft="16dp"
           android:layout marginRight="16dp"
           android:layout marginBottom="8dp"
           android:text="@string/seller" />
       <RelativeLayout
           android:layout width="match parent"
           android:layout height="wrap content"
           android:layout marginLeft="16dp"
           android:layout marginRight="16dp"
           android:layout marginBottom="16dp">
           <de.hdodenhof.circleimageview.CircleImageView</pre>
               android:id="@+id/profile image"
               android:layout width="56dp"
               android:layout height="56dp"
               android:layout centerVertical="true"
               android:layout marginEnd="16dp"
               android:src="@drawable/pak burhan" />
           <TextView
               android:layout width="match parent"
               android:layout height="wrap content"
               android:layout centerVertical="true"
               android:layout toEndOf="@+id/profile image"
               android:text="@string/my name" />
       </RelativeLayout>
       <Button
           android:id="@+id/btn beli"
           android:text="@string/buy"
           android:layout width="match parent"
           android:layout height="wrap content"
           android:layout marginLeft="16dp"
           android:layout marginRight="16dp"
           android:layout marginBottom="2dp" />
       <Button
           android:id="@+id/btn dial number"
           android:text="@string/hubungics"
           android:layout_width="match_parent"
           android:layout height="wrap content"
           android:layout marginLeft="16dp"
           android:layout marginRight="16dp"
           android:layout marginBottom="16dp" />
   </LinearLayout>
</ScrollView>
```

6. Membuat Tampilan Menuju ke pages baru menampilkan logo centang di bawahnya ada kalimat "produk telah berhasil di beli"

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout
xmlns:android="http://schemas.android.com/apk/res/android"
   xmlns:app="http://schemas.android.com/apk/res-auto"
   xmlns:tools="http://schemas.android.com/tools"
   android:layout width="match parent"
   android:layout height="match parent"
   tools:context=".SudahBeli">
   <ImageView</pre>
       android:layout width="match parent"
       android:layout height="130dp"
       android:adjustViewBounds="true"
       android:contentDescription="TODO"
       android:scaleType="fitCenter"
       android:layout marginTop="30dp"
       android:src="@drawable/check" />
   <TextView
       android:layout width="match parent"
       android:layout height="wrap content"
       android:layout marginLeft="16dp"
       android:layout marginTop="180dp"
       android:layout marginRight="16dp"
       android:layout marginBottom="8dp"
       android:gravity="center"
       android:text="@string/sudahBeli"
       android:textSize="25sp" />
</RelativeLayout>
```

7. Konfigurasi button pada MainActivity.java agar dapat berfungsi

Pada perintah berikut, button *Beli* dan *Hubungi CS* akan diinisiasi terlebih dahulu dalam class MainActivity dengan *id* dari tiap button yang sudah dibuat pada *activity_main.xml*. Lalu button-button tadi akan difungsikan menggunakan *setOnClickListener(this)*.

```
package com.example.viewandviews;
```

```
import static com.example.viewandviews.R.id.btn dial number;
import androidx.appcompat.app.AppCompatActivity;
import android.annotation.SuppressLint;
import android.content.Intent;
import android.net.Uri;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
public class MainActivity extends AppCompatActivity implements
View.OnClickListener {
   @Override
   protected void onCreate(Bundle savedInstanceState) {
       super.onCreate(savedInstanceState);
       setContentView(R.layout.activity main);
       Button btnBeli = findViewById(R.id.btn beli);
       btnBeli.setOnClickListener(this);
       Button btnDialPhone = findViewById(R.id.btn dial number);
       btnDialPhone.setOnClickListener(this);
       if (getSupportActionBar() != null) {
           getSupportActionBar().setTitle("Headphone Sony
WH-1000XM5");
   }
   @Override
   public void onClick(View view) {
       switch (view.getId()) {
           case R.id.btn beli:
               Intent beliIntent = new Intent(MainActivity.this,
SudahBeli.class);
               startActivity(beliIntent);
               break;
           case R.id.btn dial number:
               String phoneNumber = "0895359747200";
               Intent dialPhoneIntent = new Intent(Intent.ACTION_DIAL,
Uri.parse("tel:"+phoneNumber));
               startActivity(dialPhoneIntent);
               break;
}
```

Dikarenakan kedua button akan menggunakan metode onClick() yang sama, maka dalam metode tersebut akan dibuat kondisional switch untuk tiap button. Apabila button Beli ditekan, maka akan dijalankan Intent ke activity selanjutnya, begitu pula dengan button Hubungi CS.

8. Tampilan Akhir
